

WAJIHA BABAR

Junior Data Scientist | Machine Learning | Data Analyst

Islamabad, Pakistan | 03247744113 | thaheemwajeeha@gmail.com | Portfolio: <https://linktr.ee/thaheemwajeeha>

PROFESSIONAL SUMMARY

Junior Data Scientist and Machine Learning enthusiast with hands-on experience in building classification models, forecasting pipelines, EDA notebooks, and interactive analytics dashboards. Skilled in Python, SQL, scikit-learn, Power BI, Excel, Streamlit, feature engineering, model evaluation, and dashboard deployment. Experienced in real-world projects including customer churn prediction, credit risk analysis, AQI forecasting, healthcare reporting, sales analytics, and deep-learning image classification.

TECHNICAL SKILLS

- **Programming & Data:** Python, SQL, Pandas, NumPy, Jupyter Notebook, VS Code
- **Machine Learning:** Regression, Classification, Time-Series Forecasting, Feature Engineering, scikit-learn, Random Forest, Logistic Regression, Decision Tree, SMOTE
- **Evaluation:** Accuracy, Precision, Recall, F1 Score, ROC-AUC, Confusion Matrix, MAE, RMSE
- **Visualization & BI:** Power BI, Excel Dashboards, Pivot Tables, Power Query, DAX, Tableau, Matplotlib, Seaborn, Plotly, Streamlit
- **Tools:** Git, GitHub, GitHub Actions CI/CD, APIs, Joblib, Streamlit Deployment

INTERNSHIP EXPERIENCE

Data Science Intern - Developers Hub Corporation

Remote | Apr 2026 – Present

- Completed internship projects in Iris EDA, Credit Risk Prediction, and Customer Churn Prediction with clean notebooks, documentation, and GitHub repositories.
- Built reproducible ML workflows covering data cleaning, EDA, categorical encoding, feature engineering, model training, evaluation, and deployment-ready outputs.
- Created Streamlit dashboards with KPI cards, prediction forms, batch CSV prediction, feature importance visuals, and downloadable reports.

Software / Data Science Intern - 10Pearls

Remote | Dec 2025 – Mar 2026

- Supported data cleaning, validation, reporting, backend tasks, API-based integrations, and project documentation in a real-world software environment.
- Worked with Git/GitHub, agile collaboration, code-review practices, and team coordination to strengthen production-focused development habits.

SELECTED DATA SCIENCE PROJECTS

Customer Churn Prediction Dashboard | Python, scikit-learn, Plotly, Streamlit

- Built a bank churn classification system with preprocessing, encoding, scaling, model comparison, threshold tuning, and feature importance analysis; achieved ROC-AUC 0.8896.
- Delivered a dashboard for single-customer prediction, batch upload, churn probability visualization, and CSV export.

Credit Risk Prediction Dashboard | Python, scikit-learn, SMOTE, Streamlit

- Predicted loan default risk using imputation, outlier capping, class balancing, Logistic Regression, Decision Tree, ROC curve, and confusion matrix evaluation.
- Designed an interactive risk dashboard with applicant inputs, default probability, risk category, and downloadable predictions.

AQI Islamabad Forecasting System | Python, APIs, Hopworks, GitHub Actions, Streamlit

- Engineered an end-to-end AQI forecasting pipeline with hourly data ingestion, feature store integration, model training, best-model selection by RMSE, and 72-hour forecasts.
- Automated daily inference through CI/CD and visualized AQI trends, alerts, model comparison, and historical insights.

Potato Leaf Disease Classification | PyTorch, EfficientNet, Transfer Learning

- Developed a deep-learning workflow for real-field plant disease images using preprocessing, augmentation, CNN model comparison, and test-time augmentation.
- Achieved 95.67% test accuracy for Healthy vs Diseased screening using EfficientNet-B2 + TTA.

Business Intelligence Dashboards | Power BI, Excel, Pivot Tables, Slicers

- Created Sales Power BI and Hospital ER Excel dashboards with KPI cards, slicers, trend analysis, category/region breakdowns, and reporting visuals.

EDUCATION

Government College University Faisalabad - BS Software Engineering | 2022 – 2026 | CGPA: 3.5/4.0
